Subject: SBT aerial survey 4 Jan 2014

Dear all,

Happy New Year!

We finally had some suitable weather today and started the SBT aerial survey. We surveyed five lines in the west:

Line 1 128° 15.00'
Line 3 129° 15.00'
Line 4 129° 48.06'
Line 6 130° 43.08'
Line 7 131° 10.56'

Two small patches of skipjack were found but no SBT.

The weather was generally sunny with 4-7 knots of wind, cool air temperatures and variable water colour.
