

Subject:	SBT.AERIAL SURVEY
Date:	29 MARCH 2014

Table 1: 2014 Aerial Survey summary data, compared with the previous five seasons to the end of March

Updated to include data to the end of the survey for all years			
Year	Total Tonnage Sighted	Average per Line (t)	No. Days flown to date
2009	8,715	140	21
2010	18,365	255	18
2011	29,636	386	22
2012	9,867	120	26
2013	23,267	259	25
2014	27,499	304	23

Table 2: Distribution of sightings (tonnage) per longitude band for the month of March

March	128°	129°	130°	131°	132°	133°	134°
2011	0	0	0	0	380	65	0
2012	0.1	0	0	0	1570	960	809
2013	30	0	280	220	1016	367	420
2014	105	60	769	575	2323	1207	2827

Table 3: Percentage of the total sightings that were seen per month for the 2014-Aerial Survey and the previous five seasons

Year	January	February	March
2009	85.7%	6.9%	7.4%
2010	30.4%	29.5%	40.2%
2011	90.6%	7.9%	1.5%
2012	21.2%	45.1%	33.6%
2013	24.5%	65.5%	10.0%
2014	25.8%	45.6%	28.6%
